

IN THE CLAIMS

1. (currently amended): A mixture of phthalocyanine dyes of Formula (1) and or salts thereof:

Formula (1)

wherein:

M is Cu or Ni;

Pc represents a phthalocyanine nucleus of formula;

L is optionally substituted C_{1-20} alkylene, alkenylene or alkynylene, optionally interrupted by $-\text{O}-$, $-\text{NH}-$ or $-\text{S}-$;

R^1 , R^2 , R^3 and R^4 independently are H or optionally substituted C_{1-4} alkyl;

R^5 is H or an optionally substituted hydrocarbyl; or

R^4 and R^5 together with the nitrogen atom to which they are attached represent an optionally substituted 5- or 6-membered aliphatic or aromatic ring system;

x is 0.1 to 3.8;

y is 0.1 to 3.8;

z is 0.1 to 3.8;

the sum of $(x+y+z)$ is 4;

the substituents, represented by x, y and z, are attached only to a β -position on the phthalocyanine ring; and

the mixture of dyes of Formula (1) are obtainable by a process which comprises cyclisation of β -sulfo substituted phthalic acid, phthalonitrile, iminoisoindoline, phthalic anhydride, phthalimide or phthalamide in the optional presence of a suitable nitrogen source (~~if required~~), and in the presence of a copper or nickel salt, and a base followed by chlorination, amination/amidation.

2. (currently amended): A mixture of phthalocyanine dyes according to claim 1 of Formula (2) and or salts thereof:

Formula (2)

wherein:

- M Cu or Ni;
 Pc represents a phthalocyanine nucleus of formula;

L^1 is optionally substituted C_{1-8} alkylene optionally interrupted by $-\text{O}-$, $-\text{NH}-$ or $-\text{S}-$;
 R^1 , R^2 , R^3 and R^6 independently are H or optionally substituted C_{1-4} alkyl;
 R^7 is H, optionally substituted aryl, optionally substituted alkyl or optionally heterocyclyl;
 or
 R^6 and R^7 together with the nitrogen atom to which they are attached represent an optionally substituted 5 or 6 membered aliphatic or aromatic ring;

x is 0.1 to 3.8;

y is 0.1 to 3.8;

z is 0.1 to 3.8;

the sum of (x+y+z) is 4;

the substituents, represented by x, y and z, are attached only to a β -position on the phthalocyanine ring; and .

the mixture of dyes of Formula (2) are obtainable by a process which comprises cyclisation of β -sulfo substituted phthalic acid, phthalonitrile, iminoisoindoline, phthalic anhydride, phthalimide or phthalamide in the optional presence of a suitable nitrogen source (~~if required~~); and in the presence of a copper or nickel salt, and a base such as 1,8-diazabicyclo[5.4.0]undec-7-ene (DBU) followed by chlorination, amination/amidation.

3. (original): A mixture of phthalocyanine dyes according to either claim 1 or claim 2 wherein M is Cu.

4. (currently amended): A mixture of phthalocyanine dyes according to claim 1 or claim 2 of Formula (3) ~~and~~ or salts thereof:

Formula (3)

wherein:

Pc represents a phthalocyanine nucleus of formula;

L^2 is optionally substituted C_{1-4} alkylene;

R^1 , R^2 , R^3 and R^8 independently are H or methyl;

R^9 is H or phenyl bearing at least one sulfo, carboxy or phosphato substituent and having further optional substituents; or

R^8 and R^9 together with the nitrogen atom to which they are attached represent an optionally substituted 5- or 6- membered aliphatic or aromatic ring;

x is 0.1 to 3.8;

y is 0.1 to 3.8;

z is 0.1 to 3.8;

the sum of (x+y+z) is 4;

the substituents, represented by x, y and z, are attached only to a β -position on the phthalocyanine ring; and .

the mixture of dyes of Formula (3) obtainable by a process which comprises by cyclisation of β -sulfo substituted phthalic acid, phthalonitrile, iminoisoindoline, phthalic anhydride, phthalimide or phthalamide in the optional presence of a suitable nitrogen source (if required); and in the presence of a copper or nickel salt, and a base followed by chlorination, amination/amidation.

5. (original): A mixture of phthalocyanine dyes according to claim 1 obtainable by a process which comprises cyclisation of 4-sulfo-phthalic acid in the presence of a nitrogen source, a copper or nickel salt and a base.

6. (previously presented): A mixture of phthalocyanine dyes according to claim 1 or claim 2 wherein x has a value of 0.5 to 3.0, y has a value of 0.5 to 3.0 and z has a value of 0.5 to 3.0.

7. (previously presented): A mixture of phthalocyanine dyes according to claim 1 or claim 2 free from fibre reactive groups.

8. (previously presented): A composition comprising a mixture of phthalocyanine dyes according to claim 1 and a liquid medium.

9. (original): A composition according to claim 8 wherein the liquid media comprises a mixture of water and organic solvent or organic solvent free from water.

10. (original): A composition according to either claim 8 or claim 9 wherein at least 70% by weight of the total amount of phthalocyanine dye is of Formula (1).

11. (previously presented): A composition according to claim 8 or claim 9 wherein at least 95% by weight of the total amount of phthalocyanine dye is of Formula (1).

12. (previously presented): A composition that comprises:

- (a) from 0.5 to 15 parts of a mixture of phthalocyanine dyes according to claim 1; and
- (b) from 99.5 to 85 parts of a liquid medium;

wherein all parts are by weight.

13. (original): A composition according to claim 12 that comprises:

- (c) from 1 to 5 parts of a mixture of phthalocyanine dyes according to any one of claims 1 to 7; and
- (d) from 99 to 95 parts of a liquid medium;

wherein all parts are by weight.

14. (previously presented): A composition according to claim 8 or claim 9 which is an ink suitable for use in an ink jet printer.

15. – 18. (canceled)

19. (previously presented): A mixture of phthalocyanine dyes of Formula (1) and salts thereof according to claim 1 wherein M is Cu, R¹, R² and R³ are hydrogen, L is -CH₂CH₂- and R⁴ and R⁵ together with the nitrogen atom complete a morpholine ring.

20. (previously presented): A mixture of phthalocyanine dyes as claimed in claim 1, 2 or 4 wherein the copper salt is CuCl₂ and the base is 1,8-diazabicyclo[5.4.0]undec-7-ene (DBU).

21. (currently amended): A process for preparing a mixture of phthalocyanine dyes of Formula (1) and or salts thereof which comprises cyclisation of β -sulfo substituted phthalic acid, phthalonitrile, iminoisoindoline, phthalic anhydride, phthalimide or phthalamide in the optional presence of a suitable nitrogen source (~~if required~~); and in the presence of a copper or nickel salt, and a base such as 1,8-diazabicyclo(5.4.0)undec-7-ene (DBU) followed by chlorination, amination/amidation.
